

## MEDICATIONS which INTERFERE with ALLERGY SKIN TESTS

Certain over-the counter and prescription medications contain ingredients which affect allergy skin tests. Check labels of all medications you are using (including eye drops and nasal sprays) to determine whether your medication contains any ingredient listed below. For questions regarding ingredients contact your pharmacist. The medications listed must be held for at least the amount of time indicated prior to allergy skin tests.

The following **EYEDROPS** must be held at least **7 days prior to tests**:

**Pataday, Patanol, Optivar, Zaditor, Alaway, Elestat, olopatadine, azelastine, ketotifen, epinastine**

**Pheniramine** (e.g. Visine Allergy Eye drops) must be held for **≥ 48 hours prior to tests**

The following **NASAL SPRAYS** must be held for **≥ 7 days** prior to tests:

**Dymista, Astelin, Astepro, azelastine, Patanase, olopatidine**
